## ADNET Systems, Inc.

**Size Standard** ≈ 300 employees; \$57M/year revenue; SB NAICS Codes 541715 & 517311; HQ – Bethesda, MD

**Corporate Description** Founded in 1991 to provide support for: science, engineering, data analysis, IT, software applications, and education & public outreach

**Organizations we support at Goddard**  
 600 - Sciences and Exploration Directorate (610, 660, 670, 690)  
 400 - FPD; 500 – AETD

### Goddard Contracts & Capabilities

**SESDA IV: Science Support** for missions spanning Planetary, Astrophysics, Heliophysics, and Earth sciences. Scientific lifecycle support including proposal support, instrument design and fabrication, instrument operations, retrieval algorithm development, and EPO. **Data Center & Analytics Support** including operation and management of GES DISC, Heliophysics data services, HEASARC. **Web & App Development:** development of software tools for scientific research, operations, and instrument data analysis and processing. **IT Services:** comprehensive systems administration and IT security across the SED; Architecture, development, and operation of the SED VM Env.

**CISTO - SCTS:** HPC: computing & network administration including architecture, design, monitoring, and performance tuning; data science and user support, programming and analytics, cloud computing, IT Security, supercomputing equipment & storage management

**NASA/WVU IV&V:** End-user computing & technical support; data center asset management; training; computer operations & maintenance

#### Other NASA Center / HQ Contracts

#### Capabilities

Ames: NASA Supercomputing Support Services (NS3)

Sys Admin; Mac OSX experts; compliance with IT mandates

Headquarters Information Technology Support Services (HITSS)

Engineering & Operations; User Support; Data Center Cloud Migration
