

## Edge Space Systems, Inc. [Edge]

**Size Standard** Woman Owned Small Business (WOSB), headquarters in Glenelg, MD; <30 employees

**Corporate Description** Edge provides engineering & technician services for development of thermal control systems for space applications; also mechanical, IT support for integration & testing.

**Organizations we support at Goddard** Primarily support Engineering (AETD, 500) and Flight Projects (400), with occasional support for Sciences & Exploration (600) and Safety & Mission Assurance (300).

### Goddard Contracts

### Capabilities

Mechanical Integrated Services and Technologies (MIST)

(1) Thermal Engineering Design, Analysis, Testing); (2) Laboratory Mechanical Engineering, Technician Services, (3) Subject Matter Expert

Environmental Test and Integration Services (ETIS)

Mechanical Engineering, IT Support

OMES, MSESIIA, METS II, ESES II, SESDA

Thermal Engineering (Design, Analysis, Testing), Thermal Lab Support, Subject Matter Expert Review

### Other NASA Center / HQ Contracts

### Capabilities

JHU Applied Physics Laboratory MSA

Thermal Engineering Design, Analysis

**Capabilities in Other Markets that could benefit Goddard's Mission** Thermal Engineering Support for Commercial Missions, Universities, Science Institutes
