

MTI Systems

Size Standard \$5.3 Revenue, 30 employees, certified WOSB, HQ in Greenbelt

Corporate Description MTI Systems delivers innovative, responsive, and reliable Software and Systems Engineering, and Information Technology solutions and services. We develop software and advanced technologies (Artificial Intelligence, Machine Learning, Software Defined Networking, Flight Software) in our Mission Critical Lab using the Agile method and following NPR 7150 processes. We have a Top Secret Facility Clearance, DCAA approved accounting system, corporate infrastructure and financial strength to meet and exceed customer expectations.

Organizations we support at Goddard Code 400, 500, 580; JPSS, GOES R, SGSS, RESTORE-L, L9

Goddard Contracts	Capabilities
GSMO-2	Systems Engineering, Ground Systems Engineering, Design, I&T
PAAC IV	IT Security, Network and Systems Support
OMES	Flight and ground software engineering, Mission Operations support

Other NASA Center / HQ Contracts	Capabilities
Prime - RTAPS2	Cognitive Comm, Intelligent Routing, AI, Machine Learning concepts and design
GSA – UAS Comm Study	Modeling and simulation of UAS communications systems

Capabilities in Other Markets that could benefit Goddard's Mission Software Define Networking, Artificial Intelligence, Machine Learning concepts and design – Google, DHS
