

GAMA-1 Technologies

Modernizing Government. Maximizing Impact.

Size Standard	300+ FTEs ~\$70M Annual Revenue HQ: Greenbelt, MD CAGE 4RXH4 UEI L3LZRJNCQSA6; ISO 9001:2015, ISO 20000-1:2018, ISO 27001:2022 website:www.gama1tech.com GSA MAS contract number GS-35F-131CA and SINs: 54151S, 54151HASC, and 518210C AWS/Azure/SAFe Partner
Corporate Description	Mission-focused federal IT partner delivering secure cloud modernization, AI/ML analytics & automation, enterprise data management and governance, adaptive cybersecurity and compliance, and digital transformation for science and mission programs.
Organizations we support at Goddard	Code 400, 500, 600

Goddard Contracts

Capabilities

CYPRESS Cybersecurity & Privacy Enterprise Solutions and Services	Enterprise cybersecurity and privacy support: security engineering; vulnerability and continuous monitoring; incident response support; privacy/compliance reporting; standards, architecture and controls; ATO/cATO and Zero Trust-aligned implementation.
JPSS GRAVITE Government Resource for Algorithm Verification, Independent Test & Evaluation	IT management, independent test and evaluation, maintenance and sustainment for GRAVITE and the JPSS Ground Segment: systems architecture and administration, service desk, security assurance, Windows/Linux/Red Hat operations, science-data storage/distribution, monitoring and configuration management.
NOAA/NASA Interconnection Phase III Enterprise-to-enterprise collaboration and federation support	NOAA–NASA enterprise interconnection: bi-directional data-flow requirements, network transport and identity/collaboration federation, ISA/ICD updates, NASA O365/SharePoint/MIS/JDRS access, governance/risk management, and scalable support for JPSS, LEO/GEO/SWO missions.

Capabilities in Other Markets that could benefit Goddard’s Mission

NOAA/NESDIS/NWS/OAR: GAMA 1 delivers mission IT and scientific support across satellite ground system engineering, 24×7 cloud operations, cloud architecture and migration, and cloud native data ingest and dissemination. We modernize enterprise science data center operations, modernization and governance, facilities, and mission infrastructure; apply AI/ML for environmental insight and automation; provide DevSecOps/SAFe delivery; deliver cybersecurity aligned to NIST, FedRAMP, and cATO; and operate reliable enterprise service desk support.
