

Sierra Lobo, Inc.

**Size Standard** Sierra Lobo, Inc. (SLI) is a Small Business under NAICS Code 541715; approx. 700 employees; located in Milan, OH

**Corporate Description** For more than three decades, SLI has delivered engineering, test and evaluation, operations, and technical services to NASA, DoW, and commercial space customers.

**Organizations we support at Goddard** ETD/Code 500, LEO and JPSS/Code 470

Goddard Contracts

Capabilities

|                                                                                   |                                                                                                                                                                   |
|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Omnibus Multidiscipline Engineering Services III (OMES III), <i>Subcontractor</i> | Flight hardware system and subsystem engineering; technology development; system design, documentation, fabrication, integration, and test for servicing payloads |
|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Other NASA Center / HQ Contracts

Capabilities

|                                                                  |                                                                                                                                                                                                             |
|------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Test Evaluation and Support Team 3 (TEST3), <i>NASA JSC/WSTF</i> | Propulsion testing; propellants, aerospace fluids, materials, and components testing; hypervelocity impact testing; flight hardware processing; facility maintenance and operations; and emergency services |
|------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|                                                                                                                                     |                                                                                                                                                       |
|-------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| Test Facilities Operations Maintenance and Engineering III (TFOME III), <i>NASA GRC (Lewis Field &amp; Armstrong Test Facility)</i> | Engineering and technician support; manufacturing and development support; and operations, maintenance, inspection and certification support services |
|-------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|

|                                                                                              |                                                                                                                                            |
|----------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Space Flight Systems Development and Operations Contract III (SpaceDOC III), <i>NASA GRC</i> | Development and delivery of technology development hardware and software, space flight hardware and software, and ground support equipment |
|----------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|

|                                                                     |                                                                                                                                                         |
|---------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mechanical Engineering Support & Assistance (MESA), <i>NASA JPL</i> | Engineering design and analysis; manufacturing test and operations support for development of non-flight and flight instruments and spacecraft hardware |
|---------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|

**Capabilities in Other Markets that could benefit Goddard’s Mission** Organic engineering, design, analysis, prototyping, advanced manufacturing, fabrication, instrumentation, integration, and test reachback through our Technology Development and Engineering Centers (TDEC) at OH/Milan, OH/Brook Park, CA/Pasadena, and AL/Huntsville.
